Nomex®/Kevlar® lanyard web loop choker and snap hooks
96516KLYCTDE  1 3/4” x 6’

NOTE: MEETS ASTM F887 SPECIFICATIONS

The current American National Standard (ANSI Z359.1-1999) stipulates that all Snap Hooks and Carabiners must be able to withstand a minimum gate face load of 220 lbs (1kN) and a 350 lbs (1.55kN) gate side load.

The new ANSI Z359.12-2009 is effective January, 2009 and calls for significant increases to these critical requirements with the intent to improve overall user safety. The new standard increases the minimum gate face and side load requirements to meet or exceed 3,600 lbs (16kN) which is more than 10 times the original standard. This standard will also require that connectors with non-integral eyes have minor axis gate strength of 3,600 lbs (16kN). In addition to the physical testing requirements of the new standard, the gate of the connector must be marked with the load rating and the body of the connector is to be marked with a major axis load rating. Non-integral connectors are to be clearly marked with ANSI Z359.12-2009.

Note: This voluntary standard only applies to fall arrest equipment used in general industry and does not apply to the construction industry. The construction industry has their own set of standards.

**Customize Your Harness**

UltraSafe is excited for the 2016 safety season with a wide variety of new products as well as our existing lines. UltraSafe prides itself on their domestic on-site individual sewing department. Having an in-house sewing department allows UltraSafe to customize every detail of your harness. Harnesses can be customized with your design, colors, and even embroidered company logos on the webbing. To top it all off we carry the best retractable lines on the market, IKAR. UltraSafe also provides simple concrete anchor points to complex anchoring systems for all of your tie off needs. If you have any questions or if you would like a guided tour of our facility please contact one of your sales reps today.

ROOFER KITS

Call 1.800.850.5914 to find an ULTRA-SAFE dealer near you!

Roof Anchor Kit.
Includes full body harness, lifeline, lanyard, rope grab, roof anchor and bag.
96950

This unit consists of the following.
• 96305N Full Body Harness
• US-5072R Metal Reusable Anchor
• 96513 Shock Absorber Lanyard
• 96805 Lifelines w/ Double Lock Hook
• US-5000C Rope Grab for 5/8” poly-dac
• US2-BAG Bag

Economy Roof Anchor Kit.
Includes lifeline assembly with lanyard and rope grab shock pack attached, roof anchor and bucket.
E-96950

This unit consists of the following.
• E-96305N Econo Harness w/Single D-Ring
• US-5072R Metal Reuseable Anchor
• 96503 Shockpack
• 96805 Rope Grab Lifeline
• US-5000E Lanyard Assembly
• USC-BUCKET Bucket

First Anchor Up Kit.
Includes lifeline, connector adapter, tie-off anchor, hook adapter, extension pole and rope grab.
US-FAU-18

This unit consists of the following.
• US-PCM-15 Extension Pole
• US-M10A Connector Adapter
• 96590D-4 Tie-Off Anchor
• US-M10A Hook Adapter
• 96705 Lifeline (50’)
• US-5016 Rope Grab for 1/2” Rope
• US2-BAG Bag (not pictured)
**ROPES AND ANCHORAGES**

Lifelines. Double-locking snap one end, crown splice other end.
- 96805 5/8” x 50’
- 96810 5/8” x 100’
- 96815 5/8” x 150’
- 96905 3/4” x 50’

Ultra-Safe Specific Product Information

Ultra-Safe - retractables, in accordance with DIN EN 360, are produced for maximum durability using outstanding technology for the demanding conditions of the workplace. All the components important to the devices functionality are made from rustproof material, aluminum or stainless steel and shockproof plastic. This sturdy method of construction ensures that Ultra-Safe retractables are always reliable in use and especially low-maintenance.

The Ultra-Safe retractable is similar to a car safety belt in the way it functions. A restoring spring keeps the rope or polyamide strap, depending on the model, taught allowing it to respond immediately in the event of a fall without a slack rope.

If the working speed (approx. 4.5 feet/sec.) is exceeded, the brake pawls, which activate the brake system, lock into place as a result of centrifugal forces. The fall absorption required for the retractables is attained via a new type of disk brake system which can only be set from the inside.

Brake values, which you can see on the diagram opposite, are independent of any weather situation.

All Ultra-Safe retractables are constructed according to DIN EN 360 and have the requisite test approvals (CE 0299).

Ultra-Safe retractables are used when working on high buildings, chimneys, roofs and at other workplaces involving a fall hazard. We also provide solutions for safety-relevant and problematic work areas (e.g. silos, shafts).
Ultra-Safe Retractables Meet the NEW ANSI Z359.14 Class B (LE) Standard... Does Yours?

Requirements corresponding to the new ANSI Z359.14 Class B (LE) (up to 210’) and the entire product line.

To put things simply: Ultra-Safe retractables meet this standard!

List of the requirements for the new DIN EN 360:

- Design and ergonomics
- Materials and construction
- Blocking after pre-treatment
  - Blocking in a horizontal position
- Static load bearing capacity
  - Static load bearing capacity for horizontal applications
- Dynamic performance
  - Dynamic performance for horizontal applications
  - Dynamic load bearing capacity for horizontal applications
- Optional requirement in respect to fatigue strength
- Corrosion resistance
- Identification and information

MATERIAL:
- Housing: hard plastic nylon/aluminum
- Drum: nylon/aluminum
- Internal components: steel/aluminum
- Lifeline: 1” poly nylon blend or 3/16” galvanized or stainless steel cable
- Internal shock absorbing mechanism: disk brake

MAXIMUM ARREST FORCE: 900 lbs
MAXIMUM ARREST DISTANCE: 54” Max

Diagram showing a dynamic test procedure

Ultra-Safe fall protection systems function in any location position and have been tested in a simulated fall trial over an edge.
NEW! MILLENIUM 2

New Product: M2-HPSY8Y
Web Retractable Y-Lanyards with Yoke Swivel Top with 3600 lb Gate Hooks

1” Webbing. Length - 8’
Web Retractable Y-Lanyards with Yoke Swivel Top and 3600 lb Aluminum Gate Hooks. New improved swivel yoke for extra comfort. Also includes new 28” wear sleeves for added protection against web abrasion or snagging.

LIGHTEST PERSONAL B (LE) in the industry!

New Product: M2-HPSY8YCA
Web Retractable Y-Lanyards with Yoke Swivel Top

Same as above, but with large hooks. Web Retractable Y-Lanyards with New improved swivel yoke for extra comfort. Also includes new 28” wear sleeves for added protection against web abrasion or snagging.

OPTIONAL HOOK ATTACHMENT:
RUBBER BUSHINGS
Add “S” To End of Any Swivel Top Part Number

New Product: M2-HPSY8YABC
Yoke Swivel Top w/ Large Aluminum Carabiners with 3,600 lb gate.

This new light weight combination allows the user easy, one hand operation. The large aluminum roll gate allows for a 2 1/4” opening. If the webbing is ever damaged, this unit can be repaired by a local repair station or at our factory at an economical price. Also includes new improved swivel yoke for extra comfort.

New Product: M2-HPSY8YABB
Yoke Swivel Top w/ Aluminum Choke-Back Hooks

Our most innovative combination yet, eliminating the need for carrying cross arm straps, reducing the odds of lower level contact. This 3,600 lb gate can be opened with one hand operation. Also includes new improved swivel yoke for extra comfort. Light weight... lightest on the market.

Note: Approved for leading edge and foot level drops. Ultra-Safe Retractables do not require annual recertification. All retractables have 3600 lb gates top and bottom.
NEW! MAGMA 2 FOR HOT WORK

New Product: M2-HNY10Y
Kevlar Web and Wire Retractable Y-Lanyards with Yoke Swivel Top with 3600 lb Gate Hooks

1” Webbing. Length - 10’
Kevlar Web and Wire Retractable Y-Lanyards with Yoke Swivel Top and 3600 lb Aluminum Gate Hooks. New improved swivel yoke for extra comfort.

New Product: M2-HNY10YCA
Kevlar Web and Wire Retractable Y-Lanyards with Yoke Swivel Top with 3600 lb Rebar Hook Gates

Same as above, but with large hooks.
Kevlar Web and Wire Retractable Y-Lanyards with New improved swivel yoke for extra comfort.

New Product: M2-HNY10YABC
Kevlar Web and Wire Retractable Y-Lanyards with Yoke Swivel Top w/ Large Aluminum Carabiners with 3,600 lb gate.

This new light weight combination allows the user easy, one hand operation. The large aluminum roll gate allows for a 2 1/4” opening. If the wire or kevlar webbing is ever damaged, this unit can be repaired by a local repair station or at our factory at an economical price. Also includes new improved swivel yoke for extra comfort.

New Product: M2-HNY10YABB
Kevlar Web and Wire Retractable Y-Lanyards with Yoke Swivel Top w/ Aluminum Choke-Back Hooks

Our most innovative combination yet, eliminating the need for carrying cross arm straps, reducing the odds of lower level contact. This 3,600 lb gate can be opened with one hand operation. Also includes new improved swivel yoke for extra comfort. Light weight... lightest on the market.

Note: Approved for hot work.
Other locking hooks available. See page 24.
Note: The fall-protection attachment point must always be the center back D-ring.
Web Retractable Y-Lanyards -
New Swivel top with Carabiner and Aluminum Gate Hooks.

US - HPSY8 1” Webbing. Length - 8’ MINI TWIN

Also includes new 28” wear sleeves for added protection against web abrasion or snagging.

Web Retractable Y-Lanyards -
New Swivel Top with Carabiner and Large Aluminum Hooks.

US-HPSY8CA 1” Webbing. Length - 8’ MINI TWIN

Also includes new 28” wear sleeves for added protection against web abrasion or snagging.

Web Retractable Y-Lanyards -
New Swivel Top with Carabiner and Large Aluminum Carabiners.

US-HPSY8ABC 1” Webbing. Length - 8’

This new light weight combination allows the user easy, one hand operation. Rolling the gate open allows for large 2 1/4” opening. Fully repairable if webbing is damaged at a local repair station or at our factory at an economical price.

Web Retractable Y-Lanyards -
New Swivel Top with Carabiner and Aluminum Choke-Back Hooks.

US-HPSY8ABB 1” Webbing. Length - 8’

Our most innovative combination yet, eliminating the need for carrying cross arm straps, reducing the odds of lower contact. This 3,600 lb gate can be opened with one hand. Light weight... lightest on the market.

Note: Approved for leading edge and below foot level drops. Ultra-Safe Retractables do not require annual recertification. All retractables have 3600 lb gates top and bottom.

CANTILEVER TRUCK MOUNT

Email us at: info@ultrasafeusa.com • www.UltraSafeUSA.com

The Ultra-Safe truck mount bracket for cantilever arm has been specially developed for use with the Ultra-Safe height-safety device with rescue hoisting facility type HRA. The cantilever arm is designed in such a way that a load winch, can be mounted additionally to the height-safety device.

- Specially developed for mobile mount in safety and rescue cases for two persons as well as for lifting and lowering loads.
- Removable extension arm, adjustable height.
- Suitable for fast relocation.
- Can be used with HRA rescue devices
- V2A stainless steel design.
- Stable thanks to solid construction, height quality,
- Can be equipped with accessories.
- Minimum 3/4 Ton Truck
- Minimum 5/8” hitch pin with 2” receiver
- Note: 2 HRA’s can be attached and rated for 2 personnel.

Note: The fall-protection attachment point must always be the center back D-ring.
Davit Forklift Attachment

US-41-57/4FLM

Specially developed for stationary use in safety and rescue cases for two persons as well as for lifting and lowering loads.

- Removable extension arm, adjustable height.
- Suitable for fast relocation.
- Can be used with HRA rescue devices
- Stable thanks to solid construction, height quality.
- Can be equipped with accessories.
- NOTE: 2 HRA's can be attached and rated for 2 personnel.

Retractables and winches available in stainless steel cable upon request.
THE WORLD’S FIRST MOBILE FALL ARREST ANCHOR FILLED WITH WATER

The ecoAnchor is a totally unique concept in fall protection and uses renewable resources for both manufacture and installation. Due to the massive weight saving during transportation it can also reduce the carbon footprint. The anchor is constructed of a special natural rubber material that holds the bag in a solid cube form when filled with water. Its design also allows for a low weight footprint.

Note: 50 lbs per square foot.

The ecoAnchor is compatible with a large variety of roof surfaces including composite and mineral felts. It has been tested to exceed the EN795 class E standard and is suitable for use on a pitched roof of up to 15 degrees. It is also compatible for use with the Ultra-Safe 96964-80 temporary life line systems. This will allow spans of up to 80 feet by linking two ecoAnchors together to create a 2 person system simply and quickly.

When collapsed, the ecoAnchor weighs just 17.6lbs, fitting in a small bag, and avoiding the need to transport, or carry, heavy weights to the top of a building prior to installation.

- Part# US-6110WB
- Patent Pending No. 0901634.6
- ecoAnchor is a Registered Trade Mark of Checkmate Limited.
- Meets or Exceeds OSHA & ANSI Standards

ECOANCHOR FEATURES:

- Materials: Fire resistant Neoprene re-enforced with Nylon
- Dimensions: 56” x 56”
- Weight: 17.6 lbs. (empty) 950 lbs. (full)
- Capacity: 110 gallons of water
- Max User: 1 person
- Roof Types: EPDM, Mineral Felts, Concrete and Metal Deck

Fits in a small carry bag.
Setup Instructions

1. Remove bladder from bag with attachment eye in the upright position.

2. Attach water hose and adapter to intake spout.

3. Fill with water until water sprays out through the relief valve located on the opposite side.

4. Remove hose and insert plug into spout. Bladder is ready for use.

Each anchor is good for one person. The snap hook or carabiner can be hooked directly to the attachment eye.

CAUTION: DO NOT DRAG WATER BLADDER BY FILL SPOUT, ESPECIALLY IF PARTIALLY FULL. THIS MAY CAUSE DAMAGE TO THE UNIT. IF SMALL PUNCTURES OCCUR ON THE BLADDER, THEY CAN BE REPAIRED BY USING A TIRE PATCH.
THE PITCHED ROOF BRACKET FEATURES:

- Painted steel construction
- Swivel top rotates 360°
- Offers up to 60’ radius for performing hands-free roof work
- Folds up for easy transport and storage
- Installs easily on sloped or flat roofs
- Accommodates 60’ self retracting lifelines on rafters or trusses up to 4” thick and 10” high through a 1 1/2” hole drilled in the decking

Brackets Retractables
US-5073RB US-HN60
Retractable sold separately

THE FLAT ROOF BRACKET FEATURES:

- Painted steel construction
- Swivel top rotates 360°
- Installs easily on flat roofs
- Included anchor accommodates rafters or trusses up to 4” thick and 6” high through a 1 1/2” hole drilled in the decking

Brackets Retractables
US-5074FRB-30 US-HN30
US-5074FRB-60 US-HN60
Retractable sold separately

THE SEAM STOP FEATURES:

- Universal Bracket: Accommodates most self retracting lifelines
- Self Retracting Lifeline: Provides easy to use full protection for a large work area, order separately
- Portable Design: Easily moves from job site to job site
- Non-penetrating Clamps
- Adjustable: Fits seam spacing 12” - 24”
- Swiveling Design: Allows for 360 degree rotation and unprohibited movement

US-5075RR

Note: Retractables are available in stainless cable upon request.

Introducing Ultra-Safe’s New
2 Person Horizontal Lifeline System - Synthetic

This kit is available in 60 and 100 foot lengths. It is extremely easy to use, portable, and economically priced. It comes with all the components listed below including storage bag. Designed for the concrete and steel industry. The crossed arm end straps can be substituted upon request for wire rope cross arm slings for use on termination points with sharp edges.

96960-60 60’ system
96960-100 100’ system

The unit consists of the following

- 2 - 6’ anchor slings
- 2 - carabiners
- 12 strand polyester
- 1 - tensioning device
- Carrying bag
2 Person Horizontal Lifeline System - Synthetic

96952-60 60' system

This unit consists of the following:

- Unitensioner™
- 5/8" Diameter synthetic rope
- Two anchorage webbing or cable slings
- Two carabiners
- Two steel o-rings
- Nylon carrying bag

This unit performs the following functions:

1. Stretching the synthetic rope
2. Maintaining and controlling desired tension
3. Absorbing motive energy of the fall
4. Permitting adjustments to the system.
   These adjustments to the system will substantially reduce the forces on the anchorages in case of a fall.
4 Personnel Horizontal System - Synthetic

96964-80 NEW

Features:
- 5/8 inch low stretch polyester double braid with wear indicator.
- Max 80 feet up to 4 persons
- Simple to install via RVT - Rope Vice Tensioner
- Rope bag keeps equipment protected and stowed
- Easy to take down and install with quick release arm
- 15/16 inch spanner flats allow additional tension reducing sag
- Pulley will slip to avoid over tensioning
- Lightweight and portable 3.56lb (RVT only)
- Alloy construction powder coated
- Can be produced in a range of colors

The configuration of the 96964-80 System is as follows:

Up to 80 feet of 5/8 inch rope c/w a swivel socket to reduce rope twist. The RVT (Rope Vice Tensioner) is used to tension and lock system. System can be tightened by hand or additional tension may be applied with a 15/16 inch spanner, the pulley slips when MAX tension is achieved.

The lightweight device is manufactured from high grade alloy and to keep moving parts free running, the pulley, cam and swivel socket are high tensile brass. All parts are powder coated for enhanced protection and visibility.

For construction and other applications Ultra-Safe also offers its stanchion to provide multi-span protection. Simply run lines between stanchions and use a Y-type lanyard to remain attached at all times. Meets or exceeds OSHA & ANSI Standards.

4 Personnel Horizontal System - Steel
96760-120 120’ system

The unit consists of the following

- 1 - 3/8” x 120’ gal cable with turnbuckle
- 1 - US-SuperShock
- 3 - 3/8” D.F. clip
- 2 - US - 5082AC Anchors
- 1 - Pass through intermediate

Note: Mandatory every 60’
RESCUE SYSTEMS

Rescue Kit - For 50’ Lift or Lowering

96954-50

Contains the Following:

- Extension Pole
- Connection Pole
- 2 Carabiners
- Lifting and Lowering Block and Tackle Brake System
- 3/8 Static Line
- Locking Pull Handle
- Tie-Off Sling
- Carrying Bag
- Training DVD

NEW! Rescue Kit - For 100’ Lift or Lowering

US-ABS-100

Contains the Following:

- High functional safety
- Innovative construction, corrosion-resistant
- Resistant to damp, heat & cold
- Integral rescue hoisting function using a crank wheel
- Reverse lock which can latch into place
- Integrated shock absorber
- Ascend / descend speed approx. 3’ per second
- For ascend / descend heights up to 500’
- Maximum lifting height 250’
- Compact, stable size
- Extremely lightweight unit
- Does not cause undue wear or damage to the rope
- Tested for one person
- 2 1/4” Aluminum top swivel hook
- 1” Aluminum caribiner at bottom of each end
- 1 Carrying bag standard

Extension Pole

US-RPC-15

Note: Additional Lengths Available.
Cable Safety Climb System - 60’ Stainless Steel cable.  
*Note: Other lengths available.*

US-5060CS

- Sealed anchor head
- Adjustable clamp brackets
- H.D. steel square tubing supports
- Cable stand-off (every 30 ft.)
- 3/8” dia. Galvanized Steel wire rope. 60’ reach

IN0025 (2014/01)
A 6ft drop using a 96305N harness and a standard 96506 positioning lanyard with a 220 lbs test torso can generate the following impact.

OPTIONS:
1. Use shock-absorbing lanyards.
2. Use retractable lanyards.
3. Use fall restraint equipment.
4. Before use be properly trained to avoid a fall.

The fall restraint and fall arrest products shown in this catalog meet or exceed ANSI Z359.1 and OSHA regulations.
