Usage of IKAR Fall arrest devices

I can confirm that all of the IKAR GmbH devices that claim compliance to the ANSI Z359.14-2014 Standard and have fully tested in accordance with the standard, by SATRA Technology Centre, which is an independent European Notified Body (Test House) with ISO 17025:2005 accreditation and ANSIZ359.14 clearly on their scope. Please see the details from this link of Fall Protection Products SATRA Technology Centre can test http://www.satra.co.uk/portal/fall_protection.php

The IKAR GmbH SRL's HWB 1,8; HWB 1,8 DW, HWB 2; HWDB 2; HWB 3,5; HWPS 3 can be used in either orientation. i.e. the device can either be connected to a suitable anchorage point and the double action hook on the end of the lifeline to the to the fall arrest attachment point of the safety harness of the user, or to the fall arrest attachment point of the safety harness of the user and the double action hook on the end of the lifeline to a suitable anchorage point.
