RETRACTABLE ROOF BRACKET

- Requires two 1-1/2" holes in decking near truss
- Panted steel constructon

The retractable roof bracket attaches to roof decking, to provide personal fall protection for residential roofing projects, when working near a leaug edge. The system accommidates a 60' safety retractable lanyard (part #US-HN60) that provides a 360 degree movement for performing hands-free roof wok with a 60' radius. Installs easy on sloped or flat roofs. Included are two anchorage devices that will fit rafters or trusses up to 4" x 12" wide, with flexible legs that provide different roof pitch angles and a base that will hold safely a 60' safety retractable lanyard. Folds up for easy transport and storage.

NOTE: The device must be used with the Ultra-Safe, Inc. US-HN60 safety retractable lanyard.
